

Learning outcomes :

Selects and uses standard units of measurement. Reads and writes up to two decimal places or three-digit numbers.

It converts between units of measurement (kg, g, L, ml) using decimal numbers up to three digits.

Decimal, for example, it is known that 1.245 liters equals 1 liter and 24.5 ml

حجم السائل: المساحة التي
يشغلها سائل.

The unit of measurement for mass is the kilogram and the gram.

and

السعة: المقدار الذي يمكن أن
يحتويه وعاء.

Units of measurement for capacity: liters and milliliters

١ كيلو غرام = ١٠٠٠ غرام.

١ لتر = ١٠٠٠ مليلتر.

activity

Complete each of the following

7.8 kg =g

12.8 litersmilliliters

320g =kg

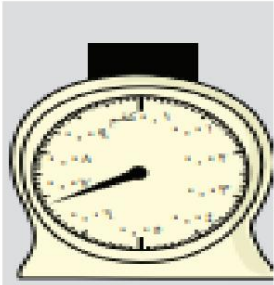

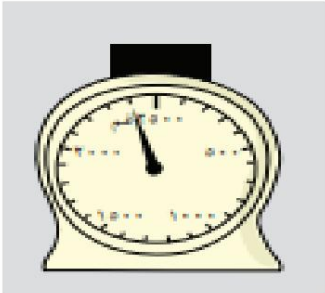

7800 milliliters =liters

an exercise

Find the reading for each of the following

.....

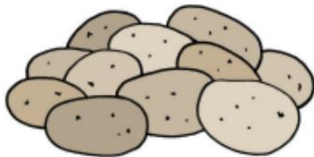

.....

an exercise

Convert each of the following into grams.

١,٣ كغم

٢,٤ كغم

١,٧٢ كغم

.....

an exercise

Convert each of the following to kg

٩٥٠ غم

.....

an exercise

45.7 liters =liters andmilliliters

343.7 kg = kg and g

٢-١٧ قياس الكتلة والسعة (٢)

Educational outcomes

-He interprets readings using different scales, employing a range of measuring tools.

-Draws and measures lines to the nearest centimeter and millimeter

activity

The nearest whole number

34.8 kg =kg

7.77 liters = liters

an exercise

Convert each of the following into a liter

٨٥٠ مل

.....

٢٥ مل

.....

an exercise

Find the measure of each of the following
